Minutes/Notes:

Mrs. Divine will continue to pursue the Crazy 8s program for elementary students through grade 6. This program will serve GT students as well as any other students who have an interest and complete an application process.

Mrs. Evans will coordinate a GT section on the school website. This will include resources for GT students/parents as well as the nomination form.

Mrs. Evans will discuss opportunities for the Infinity Hour to be used to identify and serve GT students in grades 7-12 with Mr. Williams.

Mrs. Evans will research alternatives to the paper pencil CogAT that is currently being used to screen students for GT identification. She will request quotes.

Goals discussed:

More clubs/organizations that might bring students together with similar interests.

Opportunities for speakers to present in various fields - in person or virtual

Organize a student professional development day in each building where various sessions are offered. Students can choose which sessions to attend. This might have a different approach at each building.
